

PRESS ^{Plus}

Policy Reference Education Subscription Service

IASB's full-maintenance policy updating service for Illinois School Boards

This full-maintenance policy updating service, based on PRESS, IASB's popular sample policy and procedures information and updating service, helps districts to keep their policy manuals up to date, PLUS it provides additional assistance by:

- identifying suggested policy changes for your unique district,
- clearly identifying suggested changes by providing strike-through and underlining on your district policies, and
- providing the word processing support necessary to incorporate adopted policy revisions into your local board policy manual.

Why should your district subscribe to PRESS Plus?

Board policy manuals often become outdated, despite the best efforts of boards and administrators. A full-maintenance policy service helps you keep your manual up to date with changes in law, regulations, and local conditions; saves your staff valuable time; and maintains the integrity of your manual's style, format, cross references, alphabetical index, tables of contents, and legal citations.

What will it cost?*

For an annual subscription fee you will receive a calendar year of updating and maintenance of your local policy manual, as well as online access to PRESS, the IASB policy and procedure information service.

If in addition to the full-maintenance service you choose to Web-publish your manual with IASB, PRESS Plus will be offered at the discounted rate. Contact one of the IASB Policy Services consultants listed at the bottom of this page for information on current fees.

Who can subscribe to PRESS Plus?*

If your district has contracted for an IASB Policy Manual Customization within the last 20 years, and does not currently subscribe to PRESS Plus we provide the following options:

- If your manual is 1 to 6 PRESS issues behind, an IASB Policy Consultant will update your manual at a per issue cost.* Following the update, your district will be added to the PRESS Plus subscriber list.
- If your manual is more than 6 PRESS issues behind, your district may be eligible for the PRESS Plus Development and Maintenance Service.
- Always available is IASB's Policy Manual Customization. In addition to helping boards develop an up-to-date board policy manual, this service provides a comprehensive and thorough review of the new manual.

IASB member districts may request sample policies and general policy information at any time! Additional IASB policy services are subscription or contracted services.
